

# The Making of Vecna

## INTERVIEW

**Me:** Hello..

**Vecna:** Hello human!

**Me:** Let's get started, who were you?

**Vecna:** I was smart but different boy, I saw understood things you imbeciles clearly couldn't understand.

**Me:** What do you mean by that?

**Vecna:** I saw a further purpose in life than just doing the same dilly-dally things everyday until you all perish.

**Me:** But if that was the reason why are you killing innocent teens?

**Vecna:** None of those teens are innocent, no one is. So in order to keep the worlds balance, I must kill all humans. Its just easier to start with those who are most vulnerable.

**Me:** Honestly I understand what you mean, but why are you so eager to kill number 11?

**Vecna:** Ugh, I'm tired of this question! She is the only one who is powerful enough to close the gate, so that also means... she can also kill me. So, I must end her before that can even happen. Once I do humanity will depart.

**Me:** thank you for this much needed info.

## WHO IS VECNA?

The monster form of Henry (Vecna) was inspired by villains like Pinhead, Freddy Kruger, and Penny Wise. Vecna uses peoples regrets/guilt to make them vulnerable enough for his killing, otherwise known as the Vecna's curse. Vecna is sorta a more modern version of pennywise because of his human form but his inhumane like intentions. He kills his victims in the worst way imaginable, its so bad that it leave witnesses scarred with the unforgettable image.

## WHO WAS HENRY CREEL?

Vecna, also known as Henry Creel, was born in 1947. Due to his reputation as a "troubled" child, he and his family moved to Hawkins in 1959. Henry developed a strange fascination with spiders, which led to the development of his idea of the true purpose of life. He only thought that since people "lived to die" while going about their daily stupid little routine, he would not live that way. He made the decision one day to start killing helpless yard animals and force nightmares upon his family and wanted to establish his own set of rules and bring the world back into balance. That wasn't all, he would also try to kill his father and kill his sister and mother in the near future.

Unfortunately his father was given the blame since Henry had passed out from exhaustion. Once woken up, he was in Dr. Martin Brenner's lab as his first experiment ever. He would go on to live in this building holding telekinetic children for years, without being able to use any of his own powers. On a random day however, he had enough and chose number 11 to help him execute his plan. He would go on to kill everyone including all the children in sight. El felt this wasn't right a battled Henry eventually winning and opening up a gate forcing him into the upside down.
